

## **FLAGSHIP ACQUISITION EXPRESS**

Introduction: 84% of startups that succeed are acquired.

### **Startup Marketplace Problems**

90% of startups/new products fail, and for those startups that are successful, they take 5-7 years on average to be commercialized via Acquisition or IPO.

*Of Note: of the 4,000 startups per year, top VCs invested in 200, that's only 0.050%.*

- *Of the 200 hand picked startups, only 30 (15%) will generate actual returns to their investors. This translates to only a 0.015% success rate. (Addressen Horowitz)*

### **Flagship Solution**

Flagship utilizes a proven, 61 use cases, of which 54 have been successful (89%), sophisticated 5 Step CPG Business Development Process that has generated over **\$4 Billion in new revenues** to overcome all of the above problems.

In addition, because of how this process works, the value of the startup increases by 25-50%. And all of this is done in less than 12 months, incognito, without having to generate in-market sales....what more could one want!
